## **DETAILED ACTION**

### ***Status of Claims***

1. As of the amendment filed 3/4/10, no claims have been added, canceled, or amended. Therefore, claims 1, 4, 5, 8, and 9 remain pending, with claims 1, 5, and 9 being independent.

### ***Allowable Subject Matter***

2. Claims 1, 4, 5, 8, and 9 are allowed. The following is an examiner's statement of reasons for allowance: The prior art taken either singularly or in combination fails to anticipate or fairly suggest the limitations of the claims listed above in such a manner that a rejection under 35 U.S.C. 102 or 103 would be proper.

The prior art fails to teach a combination of all of the features in claims 1, 4, 5, 8, and 9. In particular, the prior art fails to teach all of the fixed electrode, the movable electrode, the bonding face-side surfaces of the insulating substrate and the semiconductor substrate, and the equipotential wiring are placed inside the bonding area; and cutting and removing the equipotential wiring by laser irradiation allowed to pass through from the insulating substrate. Keiichi, Baret, and Sukurai all teach these particular limitations individually (i.e. Baret teaches the use of a laser to cut through a substrate and Sakurai teaches each of the electrodes and substrate and wiring inside the bonding area), but each of these references apply to differing devices, thus the combination of them would not have been obvious to one of ordinary skill in the art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
